## INTUITIVE PROJECT MANAGEMENT TOOL FOR YOUR AGILE PROJECTS

ScrumDesk is focused on support to perform Scrum techniques correctly.

It is desktop application that connects teams into one network of professionals.

Stories are displayed in form of index cards on the board.

Releases and sprints are managed in one place. Statistics of velocity is calculated based on previous sprints. Stories can be assigned by drag and drop.

More developers can work on one story. Changes are validated and stored into history. Files can be attached and shared.

Do retrospective with voting for the best ideas.

See your status on one page reports.

ScrumDesk integrates 3<sup>rd</sup> party tools.

### Benefits

#### for managers

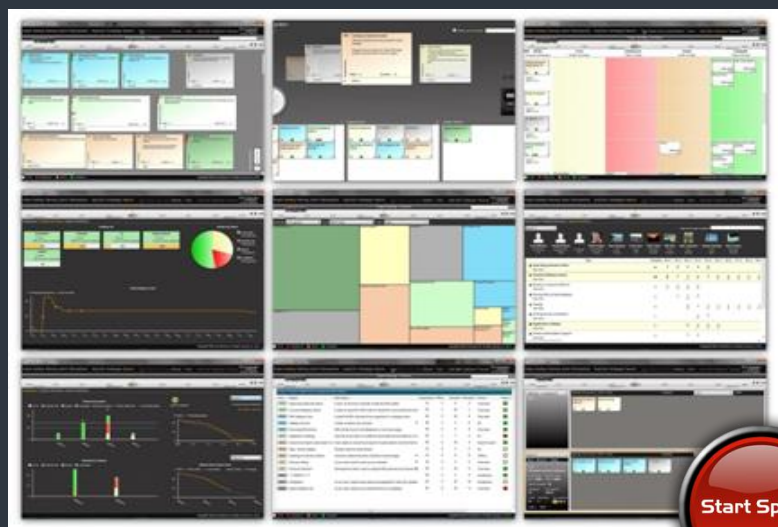

- Easy team members management
- Support for distributed teams
- Releases and sprints planning
- Instant project status metrics
- Retrospective ideas to improve
